

NanoPass[®] Suture Managers

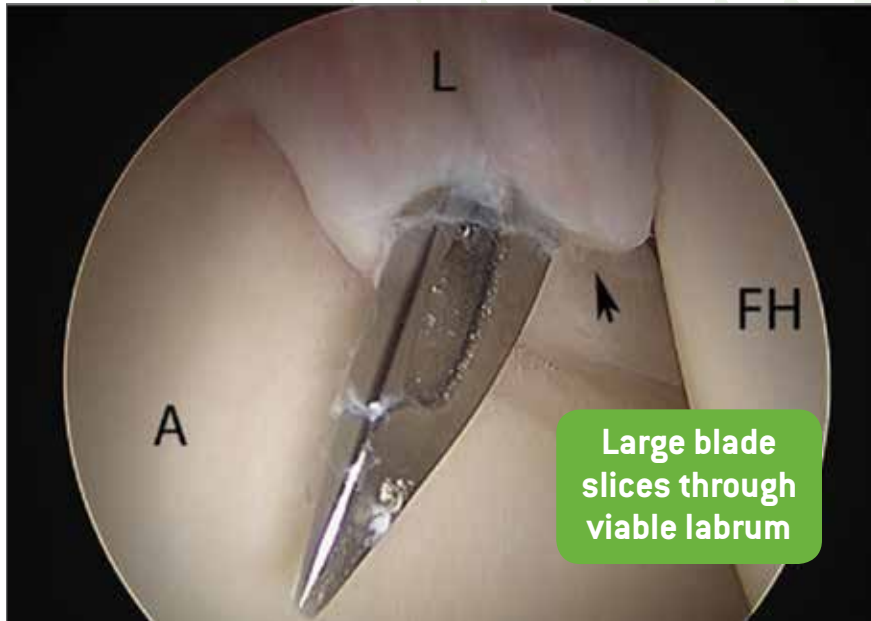

Product Highlight: 1.5mm diameter tip leaves a minimal footprint through the labrum.

“The NanoPass Suture Management System allows the surgeon to precisely place sutures in the acetabular labrum and is designed to facilitate an anatomic repair with little tissue trauma.”

Shane Nho, M.D., M.S.; Midwest Orthopaedics at Rush, Chicago, IL

NanoPass Suture Managers

Description	Possible Outcome
Bird Beak places a large defect through viable labrum	Splitting or intra-substance tearing of labrum by a large penetrating instrument
Bird Beak is too large for damaged labrum	Can't repair the labrum

Description	Possible Outcome
NanoPass small footprint through viable labrum	Intact labrum ready for repair to maintain function

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.
