

SlingShot

Single Portal Capsule Restoration

Product Highlights

- Single portal variable length braided suture delivery and retrieval
- Minimize tool exchanges by eliminating the suture shuttling step
- Customized suture length delivery allows for quick and easy suture retrieval
- Variable suture stitch placement allows for capsular plication

SlingShot

Variable Tip Options

SlingShot variable tip options allow the surgeon to pass and retrieve varying lengths of suture into the joint in multiple locations through one portal with one instrument in one pass.

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Stryker Corporation or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: SlingShot, Stryker, The Movement in Hip Restoration. All other trademarks are trademarks of their respective owners or holders.
